

# OIDA's Third Annual 2010 Seminar Series:

**Stacy Perdot-Goudy - April 30 - May 2, 2010**

## CONTACT CRITERIA ???

**Friday April 30, 2010**

Stacy does not have just one set contact criterion for all of her dogs. Instead she bases the contact methods she trains per individual dog. These workshops will give you an opportunity to have your team's contact performance evaluated individually and Stacy will offer suggestions, "show and tell" on how you can achieve more consistent contacts. These workshops will focus on the dogwalk and A-frame.

8:30 - 12:00 - 3.5 hours - limited to 10 teams.

**This session is open to those just starting their contact training, those who have not quite decided on what contact performance is best for the team, those who may be just running their dogs on the contacts with hoops, stride regulators or? without really knowing where to go from here.** This is a great opportunity to get it right from the start. Gain valuable information on the different methods used to train the contacts. Get suggestions on foundation to set for consistent contact criteria.

*It is strongly suggested that instructors and/or anyone interested in different contact training methods audit this workshop.*

1:00 - 4:30 - 3.5 hours - limited to 10 teams.

**This session is open to those who are already in full contact mode and may not be satisfied with their contact performance.** This is the perfect chance to be evaluated, with hands on instruction, by a much respected trainer/instructor, to see if the foundation that you have put into place and the performance that you are experiencing may be strengthened, enhanced, built upon.

*Great session to audit for instructors and/or anyone interested in contact training methods. You never can tell what might be best for your next agility star!*

---

### PLEASE NOTE\*\*\*\*\*

The workshops on May 1st and May 2nd (pg. 2) are a progression, as much for learning as for doing. Please consider and sign up for the workshop(s) that will support the needs of your team and then consider auditing the rest.

For example, you need the skills for independent obstacle performance and want to do the workshop. Yea for you! You will learn the tools to start practicing, practicing, practicing. Audit the others to see how you will be able to progress to more distance.

If you are not sure which is best for you, ask your instructor or training partner(s). It does not help the whole if your team is not ready to work at the level of the workshops. Mahalo!

## I WANT TO BE HERE AND HAVE MY DOG THERE!

Saturday May 1, 2010

### **FOUNDATION FOR DISTANCE** - Beginning Independent Obstacle Performance.

8:30 - 12:00 - 3.5 hours - limited to 10 teams.

Your dog must understand his/her job to feel confident to leave the handler and “go out”. In this workshop Stacy will teach and help each team recognize what may be needed to help create a strong foundation for future distance work. Independent Obstacle Performance is a must have for anyone who does not want to baby sit their dog around the course. Independent Obstacle Performance will help create a more confident dog and can carry over into every day life and training. **This session is open to teams who do not have independent obstacle performance.**

### **BUILDING LATERAL DISTANCE** - Working laterally from your dog and sending to obstacles.

1 - 4:30 - 3.5 hours - limited to 10 teams.

Building off of Beginning Independent Obstacle Performance, teams will learn the next steps towards working at a distance. Stacy will offer and implement exercises for teams to continue working on, to insure progress towards awesome distance understanding! **This session is open to those whose dogs have an understanding of independent obstacle performance.**

*Not ready for distance? Auditing is always rewarding and a learning experience. Each instructor brings their own special knowledge and ways of training. Come and audit, you just never know what you may learn!*

## I WANT TO BE HERE AND HAVE MY DOG THERE! continuing...

Sunday May 2, 2010

### **USING REAL ESTATE WISELY ON COURSE TO SET UP DISTANCE**

8:30 - 12:00 - 3.5 hours - limited to 10 teams.

From personal experience, it is easy to “forget” where one is in relationship to where one needs to be to help your dog move out away from you. Understanding how to read your real estate and using it helps. In this workshop, short course segments will be used and with Stacy’s knowledge and guidance we will be taught and shown ways to get the best use of space on course to support the dog’s understanding and trust to enjoy the fun of distance running. **This session is designed for those who are already working some distance with their dogs.**

### **ADVANCED HANDLING**

1 - 4:30 - 3.5 hours - limited to 10 teams.

**This session is designed for those running in or have run in open and elite, who are already successfully using some distance with their dogs on course.** Full course set up. Advanced handling workshop to include some distance, complicated crosses, how to analyze the course to handle it, etc. Will be lots of fun!

*This will also be a fun, entertaining and learning day to audit.*

If you have any questions contact Micki at [micki@kamuela.com](mailto:micki@kamuela.com), phone: 885.6173

### **Andrea Dexter - July 10 through 18.**

*We will be announcing Andrea’s seminar topics towards the end of February 2010. She will be attending our Feb. Fun Match and we think it is a good idea to wait and see what topics may be best for the club members and their running partners for July!*

*Stay Tuned!!!*
