President's Message

I am looking forward to having the opportunity to serve as President of the CKCSCGA; I only hope I can fill the shoes of our previous president, Alice Alford. I would like to take this opportunity to invite each and every one of you to offer your thoughts and ideas for the club. As of our last meeting a page has been added to our website per the request of Sharon Onorato Utych, offering our club's support of a very meaningful activity available to Cavaliers and their owners. Therapy Dogs is an activity that Sharon is very passionate about, and she has offered to share information with interested parties, and help them become involved. Alice Alford has offered to be our program chair, and I look forward to working with Alice, and any other members that would like to be involved in a specific area of interest to the club. This newsletter is the first issue that is being put together by our new Newsletter Editor, and new club member Denise Newlon. Welcome, and thank you to Denise for taking on this extremely important task, which is vital to keeping our club members informed. I look forward to seeing everyone at our next meeting, and let's just have fun!

Sincerely

Kay-C Phipps

A Day in the Life of a Therapy Cavalier...

“Oh what a beautiful dog!”, “What kind of dog is that?”, “What is your name, sweetie?”, “Look at his big eyes”, “His fur is so soft”. Those are just some of the comments that my boys, Finn and Skye, receive each week when they visit Dogwood Forest Assisted Living Center in Alpharetta. These comments are from the residents in the “Inspirations” section of the center, which cares for the Alzheimer’s residents.

Finn and Skye are certified, registered therapy dogs with Therapy Dogs Inc. (www.therapydogs.com). Each Sunday afternoon, we go and visit Dogwood Forest and especially look forward to visiting their friends in the Inspirations section. The faces of the residents light up with a smile when Finn & Skye enter the main room. Their job is to let the residents hold them, pet them, talk to them and hug them. My job is to make sure that Finn & Skye are safe and that nothing happens to them while the residents are handling them. Sometimes, I guide a feeble hand across Skye’s back as they smile and tell me how they once had a dog. Others just want to touch their paw and say hello. Some do not even recognize we are there until I ask if they would like to pet the dog. Then their blank stare turns to acknowledge and they nod their head. I put their hand on Finn and you can see the instant connection.

After Finn & Skye complete their Inspirations visit, we stop for a drink of water and a cookie. Then we are off to the Bistro area to visit with main residents who all wait every Sunday for Finn and Skye to come and visit. Tail wags, laps, kisses and a lot of answering questions about what kind of dogs they are, are they brothers, do they need to be brushed a lot, etc. Then we visit the open room doors to see if anyone would like to see the boys. After that, we head home, where they receive another cookie for their hard work!

I never thought that Finn, my rambunctious yapper, and my shy Skye, would ever be able to be therapy dogs. However, they passed with flying colors! The boys passed their initial test given by Ms. Diane Pettus of TDI Inc, in November, at the Club’s Puppy Picnic. Then, they had to be observed two times at a facility by Ms. Pettus before they finally passed and could send in the paperwork for them to be certified, registered therapy dogs.

Several club members also had their dogs tested at the Puppy Picnic along with Finn & Skye. I thought, would it be great

Tick Removal

A School Nurse has written the info below - good enough to share -- And it really works!

I had a pediatrician tell me what she believes is the best way to remove a tick. This is great, because it works in those places where it's some times difficult to get to with tweezers: between toes, in the middle of a head full of dark hair, etc.

Apply a glob of liquid soap to a cotton ball. Cover the tick with the soap-soaked cotton ball and swab it for a few seconds (15-20), the tick will come out on its own and be stuck to the cotton ball when you lift it away.

This technique has worked every time I've used it (and that was frequently, and it's much less traumatic for the patient and easier for me.
